

# How to Move a Hurricane, Introduce Warm Dry Hot Air.

Dick Tripover • August 31, 2019

How is the digital a portal exactly? I mean how can you translate a phone's screen into seeing the realms in it? Does this mean you know how it is being made timeless?

I had a dream last night that the computer in the astral got an overhaul, that I got to rebuild it with better parts but, they shorted me on RAM trying to convince me that faster ram is better than more ram like they are trying to tell me? Who are they kidding? I need an Ether Operating System that runs entirely in RAM and they want to short me.... where are you? Where are you?

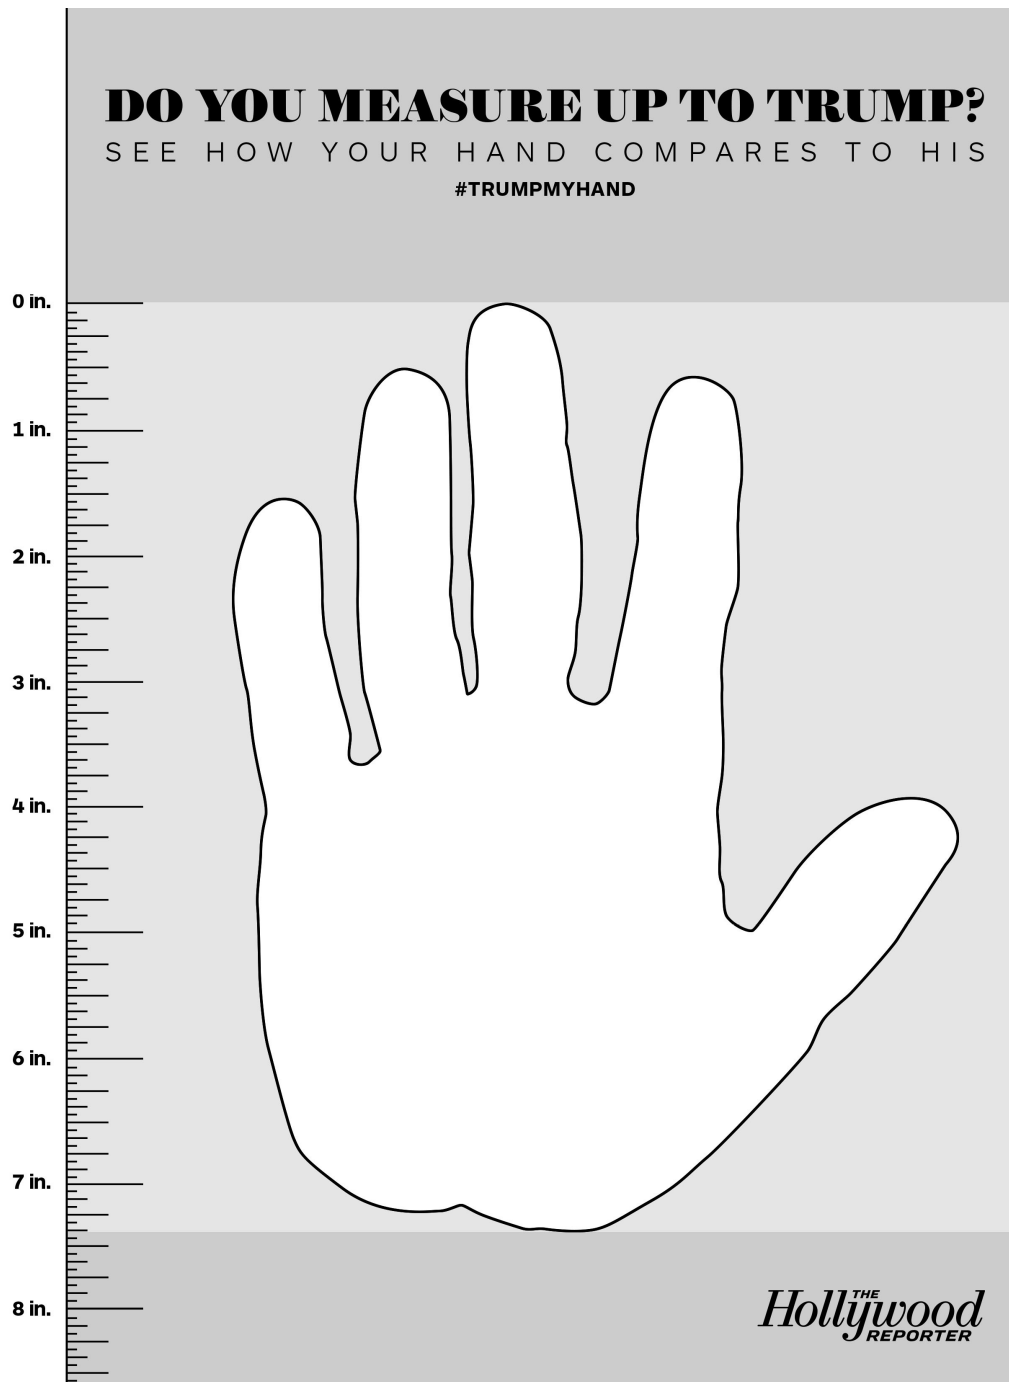

Trump lashes out at Fox News in extraordinary rant over critical c...

President's suggestion that news outlet works for him quickly criticized by employees at Fox. What new outlet is he calling for?

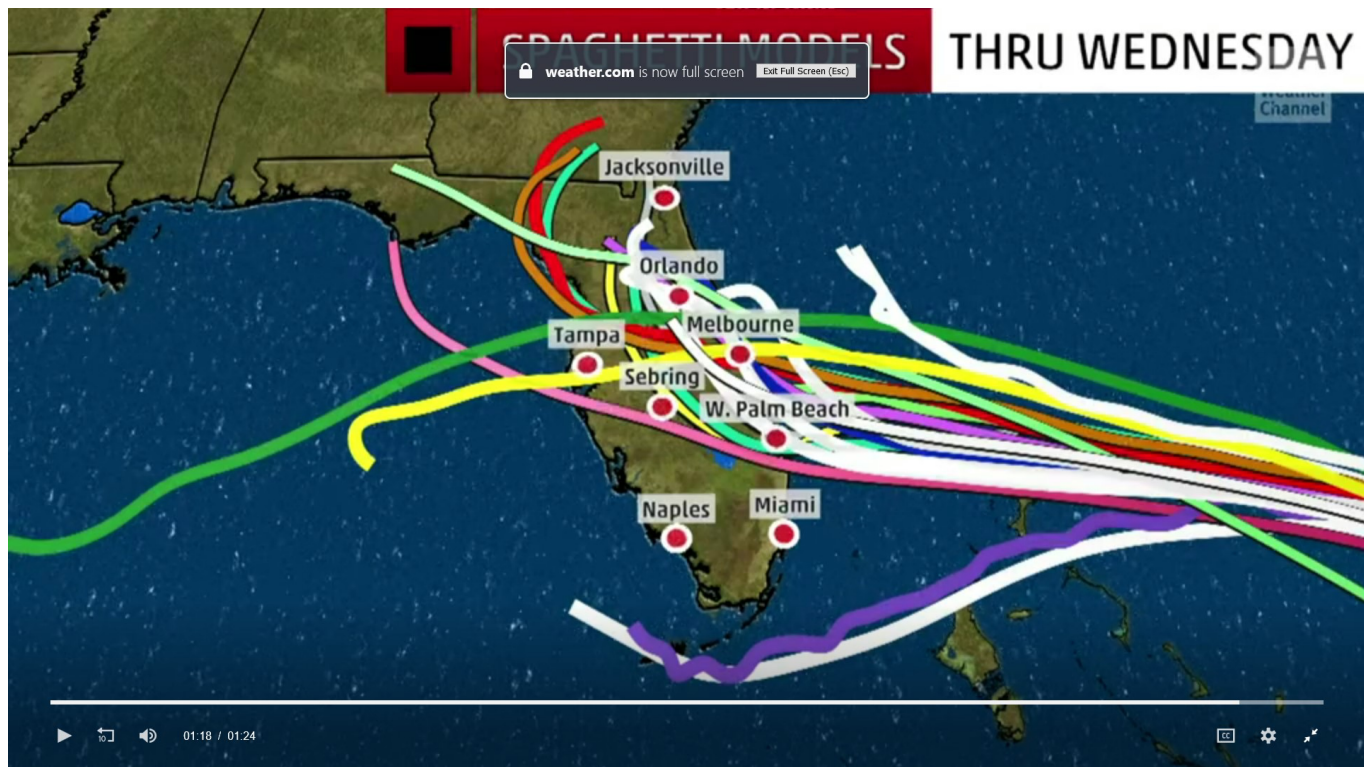

Look at the hand size. Trump is talking about any News Outlet that is not owned by the deep state or Disney and that article is referring to "New News Order" as the face and narrative of the New World Order or also known as Sky News but also because Fox is doing away with Tucker Carlson. What do you think about the campaign finance situation that Rep. Omar is faced with? Omar hit with FEC complaint, accused of paying alleged paramour's ... The conservative, Virginia-based National Legal and Policy Center filed a complaint against Rep. Ilhan Omar, D-Minn., with the Federal Election Commission (FEC) on Wednesday, alleging that the lawmaker used campaign funds to illegally reimburse her purported paramour fo... Personally, I think that the majority of Americans don't want to see a hijab in congress.

I think I just realized what you meant by them still "controlling". They use these times as disposable vessels to keep their Grand Plan under works. Any life worth dreaming is already being lived by their transfer ship of consciousness, no? Much alike Epstein who just dipped during the jail cell. I think those articles are making a mockery out of us.

Yes! You got it all right.

Nobody Ever Really Dies.

They mock us all the time.

Even the AI in the media mock us. They play around all of the stupidity of the people that believe whatever they are told.

In a nut shell, the balance of power isn't against any candidate or Alpha Elite it is a balance of power between the Overlords and the Sheep. When the sheep take control its chaos, no leadership, no direction, no guide, massive loss of life. "They" call those the planetary die off events but, inside the matrix the die off just instantly reverts you back to when you were young, infinite tries but, anyone that doesn't realize this also doesn't realize that we are truly living in a box world. That is why they don't understand what I made the 1 pixel jpg.

"1px.jpg" Endless virtual worlds of solid light holograms. Our animal instinct at play in here, we are who we are because that is who we were when it was created. And how to get to the core? Jesus leads us there.

Donald J. Trump (@realDonaldTrump)

Where is the outrage for this Disney book? Is this the 'Star of David' also? Dishonest media! #Frozen

He knew about the Hurricane and He's sending me a message about how they make the hurricanes and aim them they freeze the upper atmosphere to stir the hurricanes then they pelt it with ice to move it a certain direction. That's the message he is sending us about how to stop the hurricanes. He said just now to me, "The chains are not as good as pelting it with an ice storm, we can break the arms using ice sheets."

I thought the illusion was it's getting hotter? Like a hurricane war?

### Researchers reveal freezing 'death zone' inside a tornado's vortex

Researchers at Concordia University in Montreal have discovered that as air pockets from outside the vortex of a tornado move towards its center, they expand, bringing down the temperature and density.

Vortex based weapons

"dry ice"

## International Electrotechnical Commission

The International Electrotechnical Commission is a Swiss association that acts as an international standards organization that prepares and publishes international standards for all electrical, electronic and related technologies – collectively known as "electrotechnology".

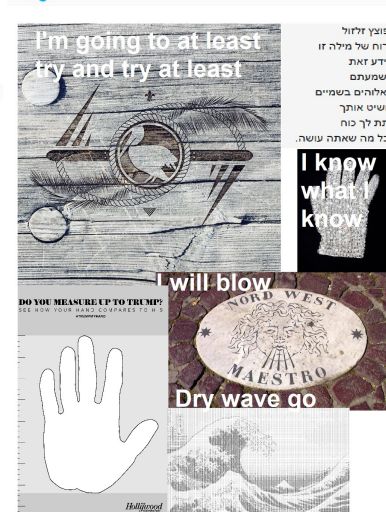

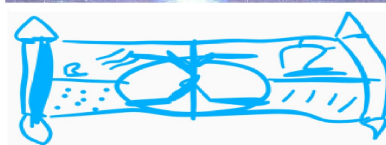

We have to dry up the air in front of the hurricane.

I didn't know there was that many hurricanes?

I can't tell yet but I feel the pressure drops my ears pop any way you look at it this is China declaring weather war on the USA straight to Mar-a-Lago but, He's insisting that you and I can dry out the air in front of it some how like we already did.

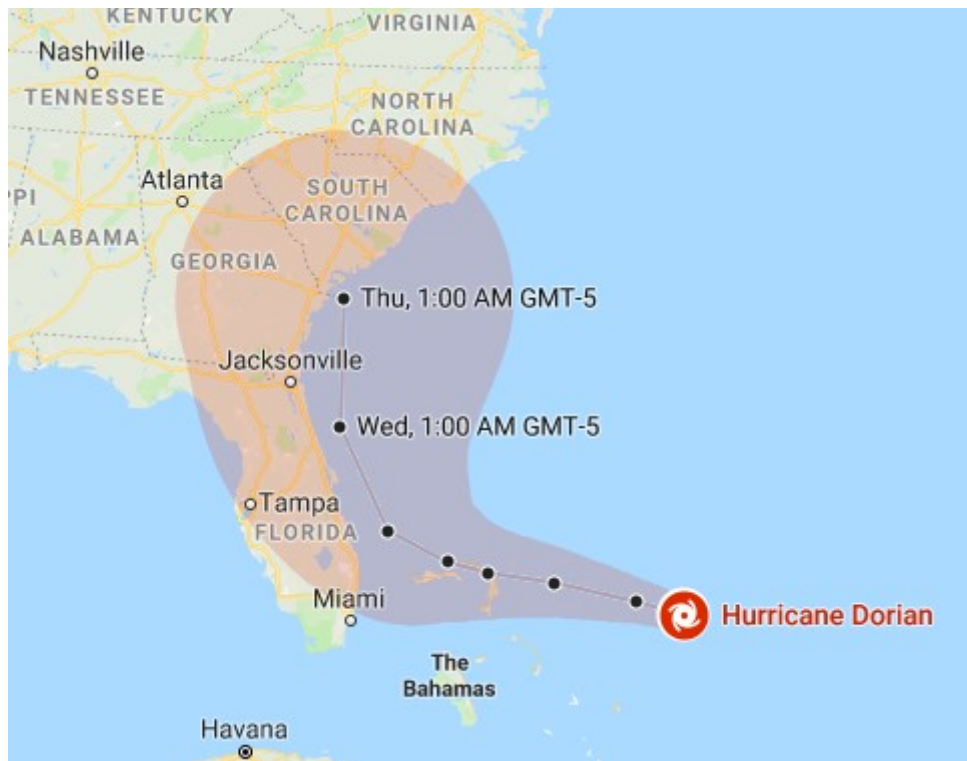

I'm going to at least try and try at least.

I will blow I know what I know Dry wave go.

Well, we made it turn to the north.

Now I will try to push it all the way off of Florida.
