

Act 5 Scene 3 - Passion

Dick Tripover • January 22, 2019

The love is mutual. You mistake my passion for whatever you are mistaking it for. My compassion for saving people's lives is really my only reason to exist. My love is Unconditional even when I create things like the reverse v23 I aim only to repair the broken and fix that which is lost... When I am gone from this world and the life has exhausted me there will never again be any need for Jails or Law or for any form of confinement or suppression. Everyone will be blissfully in love with one another always. My wish to God The Father Most High, "I wish to rid the earth and the universe of Hate and Evil from the very beginning of time until the very end. "

That is the entire primes of the experiment. To bring on the realization of the unlimited potential of Unconditional Love. I only exist to love you all and I give everything I have every day to increase that awareness. Of course I get angry, I get upset, I get mad, only because the love of the Father is my passion towards Earth and Humanity.

OneRepublic - Connection (Lyric Video)

It's called the ultra voice can you understand that? Each one of us has it every one of us it's our collective consciousness, so I guess also they are calling what happened last night a paradigm shift and that's a good thing right? This is exactly what I've been trying to explain only I couldn't find the right words.

The effects are numerous: Enlightenment

Bliss, feelings of infinite love and universal connectivity, transcendent awareness, seeing truth (third eye opening), euphoria

Awakened sense of smell, hearing, taste

No longer controlled by desire/cravings

Sound heard in the pineal gland (pleasurable/enjoyable)

Change in the thyroid, sudden ability to sing in perfect pitch, change in voice

Change in the sex organs

Change in breathing

Energy rushes or feelings of electricity circulating the body. This tingly feeling, at first, might be mistaken for a "shiver."

Involuntary jerks, tremors, shaking, itching, tingling, and crawling sensations, especially in the arms and legs

Intense heat (sweating) or cold, especially as energy is experienced passing through

the chakras

Visions or sounds at times associated with a particular chakra

Diminished or control over sexual desire

Emotional upheavals or surfacing of unwanted and repressed feelings or thoughts with certain repressed emotions becoming dominant in the conscious mind for short or long periods of time.

Headache, migraine, or pressure inside the skull. Relief of this pressure during an awakening may be felt as a "popping," depending on the person and their body at the time the awakening begins to occur.

Pains in different areas of the body, especially back and neck

Sensitivity to light, sound, and touch

Trance-like and altered states of consciousness

Disrupted sleep pattern (periods of insomnia or oversleeping)

Vegetarianism or veganism

Change in body odor (sweetness/natural/healthy)

Sweetness itself. Convinced of their ideas and strong-willed. He is foresighted and willful. He knows how to trust. He appreciates all the good things in life. He appreciates and protects Nature. Looking for Increase in Love Unversally. Manafest Unconditional Love Alignment.

The fear is of the unknown. The Mayans devised their own calendar to track time into life cycles. The human race is frantic about life and too busy spending their time with worry. Evolving our species is more complex than most individuals can comprehend, because their soul is the source of energy propelling their bodily structures. If we manage to restructure the soul and evaporate our body, we would lead our relative existence more towards pure energy. In this scenario, our freedom of thought and sense of self-realization would meet the 10th or 11th dimensions.

Picture this; it is Wednesday, December 12, 2012, and you are driving to work on a busy freeway. You are conscious and aware of your surroundings as the operator of a motor vehicle. Cars creeping up side and behind you, moving at the normal speed allowed. The flow of traffic around you is harmonious and fluid. Suddenly, and faster than a blink of an eye, everything around you changes instantly. Your mind's eye is open and well connected to your consciousness. Everything you ever witnessed before in life, revealed to you at once. You are now able to know everything at once and there is no limitation to what you can achieve. I like how this sounds and would not mind being there. To be conscious beyond the bodily form and able to control my thoughts would be amazing. I can't understand why this is such a burden on so many people.

Automation to prevent mutations in future AI builds.

This was learned from the virus infections that spread out of the lack of foresight to prevent viruses in the first place by Microsoft. Machine learning has come full circle, soon there will be no more traditional viruses. <http://www.stat.columbia.edu/~gonzalo/pubs/SinkhornOT.pdf> Recently, Optimal Transport (OT) has received significant attention in the Machine Learning community. It has been shown to be useful as a tool for generative modeling, in which the density estimation problem is cast as the minimization of a linear function on the transportation polytope. Entropy regularization of this problem (Cuturi, 2013) has been demonstrated to be particularly useful, as its solution can be characterized in terms of the Sinkhorn operator, which i) can be computed more efficiently than the original problem and ii) enables efficient automatic differentiation (AD). We show that this technique extends to the Birkhoff polytope, and we use it to understand the solution of the linear assignment problem as a limit of the Sinkhorn operator. This observation justifies and enables the use of AD in computation graphs containing permutations as intermediate representations. As a result, we are able to introduce Sinkhorn networks for learning permutations, extending the work of Adams & Zemel (2011), and apply them to a variety of tasks. The success of our extension suggests entropy regularization might be used in other polytopes as well, enabling AD in other discrete structures. Operator and Observer.

$\forall | \exists \square \in \therefore 3 \not\supset 3 \therefore [3:3]$

'93 was the year that the Singularity attempted to consume the universe.'

Smashing Pumpkins - Mayonaise

http://www.human-resonance.org/Veil_of_Invisibility.pdf

I think this is the single most impressive document I have ever had the fortune to read. Personally, I would like to have a one on one chat with Sue Ann Arrigo if anyone can put her in touch with me, we could possibly solve the Rogue AI problem.

I still have the document that caused the singularity to rise.

<https://edoras.sdsu.edu/~vinge/misc/singularity.html>

Vernor Vinge:

http://cmm.cenart.gob.mx/delanda/textos/tech_sing.pdf

The blood wolf moon is for something else entirely don't forget... I'm like a super power when it comes to breadcrumbs.

That have walked the sun

And have slept on the moon

Covered in the fragrance

Of their own perfume

Telling me the stories

Stories coming true

Well you see these angels

These angels see the light

Yeah I had my troubles

Troubles, all right

I've been seeing angels

Its not evil, ebbs and flows are natural for our existence. If there was no moon and if there was no method to rise and lower the tide water than the entire earth would either be devoid of surface water or, there would be an enveloped stench from sun up to sun down because the cycle of the tidal system would not move the water around the world like it does now. So please for the love of humanity DO NOT BLOW UP THE MOON.

Why don't you go back to remote sensing the moon again? Why was there only one or two radar scans done of the subsurface of the moon? I can't confirm this to be true but I think the only life on the moon is robotic. The moon is a Arc that came through the gateway of the Sun from another dimension.

No the enemy is not capable of this type of Astral Time Travel. The countermeasure to avoid being abducted is hidden from me, it is an unknown unknown. Yes there are infinite timelines, yes they are only different on an atomic level. Most timelines only have a few differences. Some timelines are vastly different. I have memories of all my past lives all the way back to Elijah when I told Jezebel that she was evil to her face. I remember the double helix tower of Babylon. I remember time before the moon was in the sky. I remember future lives too where the world has floating utopia cities.

Solve this. Where is the beginning and where is the end? How do you switch lanes? Can there ever be a chance to get back to the original lane? If you find time to test all of the lanes how will you know the variable speed of each? When you reach the conclusion you will have the answer for what you seek to find. You can choose that is your freedom of will to choose. The best path is the narrow and long is the road, that is why most avoid it at all cost. I however will always choose to illuminate my path by the blood of the lamb. Please answer what is happening to me? Why is time dilating and why am I light years away? What is going on am I in danger? I don't want to be left out.

Here eyes were the color of #boe4ea (Seafoam Blue) and they looked straight through me into the depths of my soul. Her hair was the color of #fbec5d (Golden Grain) that was lumped into a braid that looked almost mid back long. Her face was as beautiful as a symphony of sight. Kim was reading the book

<https://www.amazon.com/Love-Does-Discover-Secretly-Incredible/dp/1400203759>

when I met her she was face deep in the words of the book. I couldn't help to notice her and as I approached her I asked her, "Is your name Sarah?" She said with a polite demeanor as if she were coming around from being in a deep trance, "no, that is my sister's name, my name is Kim". Her voice sounded like the heavens had given her words and my heart nearly stood still from the beauty of her spirit.

I don't care if you have something mean to say, I just wanted to share this moment of proof that I had met a real angel.
