

# Today get some love

AND then get some more

you don't know anymore how to get paid but that is too why you are sad

the best thoughts come while you are listening to Beethoven

but they are visionary

and in nature too they are to help you see the vision of possible futures

then you can back track those futures to where you are here

to see how what you say next

will impact those in a positive way

you speak thoughts of positive

cut the negative

I can go anywhere I want to go

I can be anyone iI want to be

I will do this today

Everything I do today I will do for a better tomorrow

when I think about this it makes me happy

for a bright future is what you make it
