

It's a good thing you don't eat crayons isn't it.

Dick Tripover • August 16, 2018

Can you hear them calling? can we find some justice for the king? "Who? Who could do these things? It's not the government, it's more than the government. But I don't know" Says the Angel Michael to Dieter "I don't care...they can take me. I don't even care about my life anymore; I just want my children to be okay, my angels. I want them to be safe." As he put down his cup oh mojo for the very last time. "I've got. to go." {End-of-call} Transmission sequence activated 5,4,3,2,1 It's the Eye in the A Yes there is an I in team. it is between the A hole.

"Heal The World"

Michael Jackson - Heal The World (Official Video)

Soda Pop Hype

I really shouldn't be telling you what I am about to tell you, but I want to see what happens when the intelligence agencies that monitor this site become aware of what I

am about to post. Also, I have decided that my first flavor of Soda when I get the biz up in running will be "schizophrenic sour apple", followed by "mobius strip mango". right, this will be short, let's get to it. As I have sort of mentioned, I entered a crazy reality portal hub at club med with me and the other guys. The real apocalypse starts with the failure of the first sacred water child, and that takes place right at the end of the machine apocalypse which comes in phases. However, there is a PRE-Apocalypse, which is happening currently, we are about 18% of the way in, and it melds and leads us into the machine apocalypse. All of this which I will be explaining right now. I really shouldn't, but I want to see what happens. let's get to it. Now, by law I am supposed to be COMPLETELY hands off for this part, so even mentioning this will get me in trouble... But I want to see how you all react and the xenomorph prison ship wasn't really that bad.

Charles Manson

https://en.wikipedia.org/wiki/Charles_Manson

Manson believed in what he called "Helter Skelter", a term he took from the Beatles' song of the same name to describe an impending apocalyptic race war. We are going to be talking about Helter Skelter So basically we are just starting to get into helter skelter. See a lot of these poor insane individuals are people who get their auras stripped away and then the insect spawn of Campbell start pouring in from everywhere and latching onto them and whispering in their ear. People can lose their auras in many ways. And through this they learn things. I'm not asking you to believe any of this. See, there is the realm of Campbell, which is pure (dark logic) and Disney which is pure <bright magick> and then our in-between world which has varying degrees of science and technology and philosophy and "little magick" that the demons and angels (as you call them) use to anchor their influence to our blended BOB made reality. Usually only hard science prevails here, but when reality gets soft, for whatever reason, these pseudo science become relevant. Now, about what is going to go down. And why... SO, with the coming rise of the machines, why would an apocalyptic race war even matter?

Good question

It has to do with parties trying to prevent the apocalypse and those who are bound to start it. I am totally neutral towards this issue, but this is what is going down. So these Freemasons that established the holy masonic empire of the world right? Well, they did this so successfully by gaming the karma system. YES Karma IS real, it's abstracted universal application of the principal that every action has an equal and opposite reaction. So these masons, they mostly had to contend with humanities tendency to destroy itself and that there are lots of evil dangerous people... So they gamed the system by declaring their intentions to be saving mankind while using evil people to do good. The reality of course is that they though they were building bug nests for Campbell, not that they had been hoodwinked by SSSSSLLLLLLLLLOOOOOOOOWWWWWWW rumbling mother earth.

Alright so the way karma works in human civilizations is the what I call "Cycles of prosperity" In order for what I am going to tell you about helter skelter to make sense, I have to go into an in depth discourse on all this, so bare with me. Alright, so basically since the dawn of human civilization, we have been going through these cycles, little one rolling around in bigger ones all pushing towards the future and bringing back the past (metaphorically in this instance).

Society starts with a philosophy or religion that inspires and motivates a warrior class to fight (in america it is Liberty) and provides guidelines for policy and law. What the vast unwashed masses believe means nothing because they are not the ones with the organize guns and money, which comes from the ruling culture. Now, I have to get real anthropological on you and break down these cultural philosophies and religions and why they matter to YOU whether you believe in them or not.

Then A little history about how we got to where we are so you can see where you are headed. You see, the main thing preventing the total collapse of culture and social norms in developed countries is the same thing destroying it, materialism and capitalism and consumerism. okay, so up until recently in history, we had a ruling group who guarded their philosophies and commanded their warriors and administrated their economies.

Now, in these old communities the society was an extension of the self. you looked around and you knew you were home, everyone looked like you and you all believed the same things. Yes there were slaves but these slaves were (for the most part) the

captured enemy who would destroy you mercilessly if allowed freedom. Regardless, many hearts bled at the idea and sight of slavery in society. so usually what happens is that some guys get power and say, hey guys, we should all get along, and then BAM you get a bunch of incompatible people trying to live together and everything goes to shit and the civilization ends. this usually takes a while and IS VERY painful for everyone involved.

The Offspring - "Come Out And Play"

Then the survivors group together say "never again, for real this time" and make a new philosophy and warrior class but something changed, we had enlightenment. Which was posed to finally enable and make real the peaceful cohabitants of different cultures and groups. Even though such a thing is impossible. to make last forever, just like any civilization, more on that in next post. I will get to why this matters during the rise of the machines and AI right, so enter the Freemasons, who learned conspiracy form the master survivors the Jews and learned of ancient civilizations. Their recruits hearts bled at the idea of slaves and inequality, but their masters knew the true purpose... which was to enslave all under the great and infinite machine that sees all and is inside all, but the masons, in their minds, had finally found the way to bring liberty to all... you see, from their prospective of history, the answer was obvious... it was the religions and cultures and ruling philosophies that created

division in everyone.

They would do away with these things in human civilization, and embrace materialism, for you see, if they could bring PROGRESS through science, they could solve all ills. Poor bastards did make the world better for a lot of people in some ways, and worse in others. For before the industrial revolution in Europe, men lived free in homes on open land, but then cities were made to service the machines and people were hoodwinked into slavery within these cities where there was homelessness and uncleanness and disease.

AND THIS CHANGED EVERYTHING

London 2012 Opening Ceremony Pandemonium Industrial Revolution Sect...

The masons answered these questions with more science, for they did not understand that every new understanding unlocks another latch and brings nearer Nyarlathotep. This is all necessary to understand helter skelter. And it was then that Nyarlathotep came out of Egypt. Who he was, none could tell, but he was of the old native blood and looked like a Pharaoh. The fellahin knelt when they saw him, yet could not say why. He said he had risen up out of the blackness of twenty-seven centuries, and that he had heard messages from places not on this planet. Into the lands of civilisation came Nyarlathotep, swarthy, slender, and sinister, always buying strange instruments of glass and metal and combining them into instruments yet stranger. He spoke much

of the sciences—of electricity and psychology—and gave exhibitions of power which sent his spectators away speechless, yet which swelled his fame to exceeding magnitude. Men advised one another to see Nyarlathotep, and shuddered. And where Nyarlathotep went, rest vanished; for the small hours were rent with the screams of nightmare. Why is nyarlathotep important? It is the true nature and purpose of technological progress. We aren't stabilizing reality, we are destroying it but these masons, the only thing they can do is advanced the sciences, to fix problems that their science and progress had created. Enter materialism, enter capitalism, enter consumerism, communism, and the modern age.

Aqua - Barbie Girl

For you to understand the true power of these philosophical concepts and their effects on society and why they matter for helter skelter and why helter skelter matters, I need to explain the simulacrum and then the role of the AIs and their enforcement of our "set of norms" which runs souly on the mass of third world slave labor and war economy. all of this is necessary for you to understand the significance and reality of "helter skelter" now I'm gonna open up an old dusty book and read to you. and then give you a new perspective.
